Scope

The journal publishes articles in all fields of tropical biology and conservation. Selection criteria are the amount of new information, quality and interest to a general readership. Studies with a strong experimental design, prolonged field work and taxonomic-systematics studies of whole groups are typical of the type of papers that are accepted, while preliminary studies and highly specialized reports are not.

Why submit?

Fully indexed Web of Science, Scopus, Web Google Scholar, Current Contents, Science Citation Index, Biological Abstracts, Zoological Record and 41 more. Open Access (more likely to be cited). For authors: ten first printed pages free. Rapid publication; widely read in countries with the highest biodiversity, where your article can have the greatest impact. A dedicated staff gives you personalized treatment.

Estimados autores:

Como parte de las mejoras en la producción de la **Revista de Biología Tropical/International Journal of Tropical Biology and Conservation**, estaremos dándoles la oportunidad de introducir personalmente los manuscritos al sistema OJS (Open Journal System).

Esto les permitirá conocer en todo momento el avance de sus documentos, facilitándoles los procesos de publicación.
